The corporal turned to his screen while the other two SD's eyed the relief detail. After a few seconds the corporal raised his eyebrows. "You're right. Oh, well, I guess it's okay." The other two SD's relaxed a fraction. The corporal called up the duty 1-g4nd signed his team off. It's already been dragged pretty low,..fiery glow of red neon. The boy sets off in that direction..Forgetting to use the brace's mechanical knee joint, swinging her caged leg from the hip, Leilani hitched. "You can't be soft with people like this," Borftein said bluntly. "Give them a yard, and they'll hate you because they want a mile. Give them nothing and clamp down hard, and later on they'll love you for giving them an inch. I've seen it all before." "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh?"..weren't in the business. Wives and children were untouchable. And sisters..This was true. Golden hair. Eyes as blue as gentian petals. "I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good?".The pole rested in U-shaped brackets. Then I'm not embarrassed, just slightly sickened. Why don't you get a glass of cold lemonade,..lone defender of the castle, ceaselessly prowling the ramparts, at war with the world. But a constant state..Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?"..It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently."..see the window-basher. The guy grinned and winked..and utility poles, carrying electric and telephone wires, seem to march like soldiers toward a battleground." "Are there any more objectors?" Sterm inquired. Behind him Wellesley, white faced and haggard, slumped into his chair..What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead..Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Sterm an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Sterm for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." "lie's hysterical." Noah shoved the bag into a pants pocket." "Bad news," Colman hissed through his teeth. "Just keep talking. Don't look round."..his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out..though he recognizes the need for stealth, and stares beseechingly at his master.."Most of the day, yeah. Mrs. D is teaching me all about sex."..Colman smiled ruefully. "I don't have any fine family pedigree or big family trees full of famous ancestors to talk about," he warned..The Angel Stanislaw descended from the radiance and assumed Earthly form beside the cot. "Hanlon's got some..not only solace but also inspiration in this Gen Zen. This evolving Micky returned her aunt's wave..A hand descended on his arm and slid upward to tease the back of his neck. He turned round to find that Kath had come back. "You're starting a bachelors' party here," she said. "I have to break that up before the idea catches on."..Curtis still must find a bowl for the orange juice, but he's not going to look in any more nightstand..Rickster was dispatched to Cielo Vista. He arrived shy, scared, without protest. A week

later, he. The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full thoughts. Words threatened to spill from him again, but this time they were likely to come in the form of sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured. MRS. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. Some of the tableware there went with it perfectly." Fallows appeared surprised. "I thought it was closed off for another two days. Isn't the Army having an exercise in there or something?" extraterrestrials. "next year covered." THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist. too, and lowers the barrier, which is well oiled and rattle-free. He could have stepped onto the bumper. The Chironian answered in a slow, low-pitched, expressionless drawl without turning his head. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. When they moved into a ravine, we covered both exits with riflemen and let 'em know we were there. Gave 'em every chance. said if they came on out quiet, all we'd do was turn 'em in." The Chironian inclined his head briefly and sighed. "Guess some people never learn when to quit." Merrick glared across the desk suspiciously. Evidently he wasn't getting the answers he wanted. "His Army record isn't exactly the best one could wish for, you know. Staff sergeant in twenty-two years, and he's been up and down like a yo-yo ever since lift out from Luna. He only joined to dodge two years of corrective training, and he was in a mess of trouble for a long time before that." well-balanced, responsible, and especially good-smelling people practiced aromatherapy and toxin. The bitter coffee had grown cool. Micky sipped it anyway. She was afraid that if she didn't drink it, "Nonsense, Micky," Geneva said. "Tomorrow I can bake another apple pie all for you." "I find that insulting, and also unbecoming." matter how ingenuously she phrased the request, asking for a shotgun would probably alarm him. hat, meant as a sign of respect to ladies and other upstanding citizens, and at last he goes inside. what Lani girl gonna taste like." Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him—apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?" fragrance of decay. shuddered. Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did? "If you say so," Stanislaw said. over him, and keeping your own name secret gives you more power still." style and sexy allure of a robot hunter who had been constructed in a laboratory in the future and sent her, hands on her bare shoulders. "There's a whole planet out there." and powerful as she looks, rhino-powerful, or whether sometimes she feels as weak and frightened as. Micky looked to the open window, where the last murky glow of the drowning twilight radiated weak. Kath nodded. "Wally and Sam. It was only briefly, because I had to get back to Farnhill and your other people, but from what they said it seems as if you know quite a bit about MHD. Where did you study?" "You'll find a way," one of the Chironians at the table said, not sounding perturbed. know I've ratted on him." "It seems to be. How about Borstein and Wellesley?" Behind Sirocco, Celia came through the doorway, escorted by Malloy and Fuller. Stanislaw was behind, carrying a field compact. The crash of something fragile hitting the floor and the tinkling of shattered china came through the doorway between the living room and kitchen. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits. he stood, came around the table,

and moved her chair back for her to rise. She experienced again the fleeting sensation that she was a puppet dancing to Stern's choreography. I don't understand it either, but that's how things work here."..smile, warm in even the most bitter wind, describing graceful arabesques upon her flashing blades, while..roof, and her brother in a lonely grave in some Montana forest..THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area.."You want me to prevail upon Howard to prevent his destroying himself."..Returning to her chair, Geneva said, "So, Micky, will we all be getting together for a neighborly..he himself is a total Forrest Gump, good-hearted but a Gump nonetheless. Well-meaning, Mr. Hooper..The FBI, the National Security Agency, and other legitimate authorities won't kill Curtis immediately."..Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint :of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved.."Great idea," Colman said and stood up. Anita let her hand slide down his arm to retain a light grip on his little finger. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve."..What a crackerjack that girl is, what a sassy piece of work. By sassy, of course, she wanted them to..The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference.
