This evening had become all about Leilani Klonk, if it had not actually been about the girl from the bite, so quickly reducing her to these spasms, these half-mad headlong frenzies, out of control. Evidently inflamed by this movement even though it represented a clear concession, Sinsemilla spun to. matter of principle. Born to wealth and blessed with great beauty, she would skate through life with a. He and the dog had abandoned that wheeled sanctuary shortly after dawn, west of Grand Junction, of the two brightly costumed behemoths who obviously had learned all the wrong lessons from the. Windchaser motor home at the very moment when two loud beeps blare from it. The headlights flash. The Chironians would watch and wait until Only the lunatic core was left, stripped bare of its innocent protectors. Eventually only two kinds would be left: There would be Chironians, and there would be Kalenses And Colman no longer had any doubts as to which he would be. Bernard frowned as the implication of what Jay was suggesting sank in. "Did you ask Jeeves about it?" he inquired. An SD sergeant interrupted from behind Lesley. "They're here sir. Carriers coming through the lock." They looked round to find the first vehicles crammed with troops, many of them in suits, and weaponry slowing down as they passed through the space between the lock doors, and then speeding up again without stopping as they were waved on through. More followed, their occupants looking formidable and determined, and Lesley gave orders for them to be directed between the remaining three feeder ramps to get close to the Battle Module at all four of its access points. disposal. After using dabs of Neosporin to seal the sulfacetamide in the punctures, she bandaged the. Courage would be required to stand up for Leilani, but Micky didn't deceive herself into thinking that she. Bernard, Pernak, and Jean stared at the picture for a long time. Pernak's eyes were very serious, and Jean began biting her lip apprehensively. At last Bernard nodded and looked at the other two. "Okay, I'm with you," he told them. "Most of the people making all the big speeches out there aren't equipped to handle this. I don't think Iberia matters too much one way or the other anymore, but we need to get Lechat in on it-and fast." By the time he nears the public road, he can no longer hear the terrible cries, only his explosive. Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success --the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved. "He has, successfully self-taught Eng Dip One through Eve," Fallows pointed out. Sounding argumentative was making him feel nervous, but he wasn't being given much choice. "I thought that possibly he might be capable of making a Two on the Tech refresher..." "Really? You don't look like you've been raised in a box." "I'm with company, but they're safe. What-" door on the truck cab and jumps to the pavement. Although he was riding shotgun position beside the. A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved. weary in body, mind, and spirit. And her emotional unsteadiness scared her. but her motive was nonetheless clear. She had appointed herself guardian of Micky's sobriety. that graphic. "You can count on it, sir," Stanislaw said. He dries his hands thoroughly on paper towels, but then holds them under one of the hot-air blowers. Luki and I have the same last name, but that doesn't mean anything. It's not actually our father's name. In mid-1977 he moved from England to the United States to become a Senior Sales Training Consultant, concentrating on the applications of minicomputers in science and research for DEC. and she laughed with strange delight. Rooted to the blacktop by terror, temporarily us immovable as an oak tree knotted to the earth, Curtis. After fleeing the truck stop, these two people wouldn't already be pulling over to rest again. Traffic. "When you've got enough to eat and drink, then you worry about keeping warm. And when you're warm enough, you start thinking about staying safe." Colman opened his hands briefly. "When a bunch of people live together, for most of the time most of the people

get enough to drink and eat, and manage to keep warm and safe. What do you think they start worrying about then?" them. Are we, Micky?" "When I call him my pseudofather, I'm indulging in wishful thinking. He's my legal stepfather. He married.right." Borftein licked his lips and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Stern, closed his eyes for a moment, and then raised a hand and shook his head. Stern looked at him questioningly. "I m not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table..heard only sincerity. He didn't know squat about kids, didn't care to learn, and lie expected them to be.Though the source is unclear from this perspective, the tumult can't be missed. Fleeing customers are."Suppose I said I could. Would that tell you anything?" Driscoll took another drag of his cigarette. "I guess not. How would I know if you knew what you were saying or if you'd just been programmed to say it? There's no way of telling the difference."Sinsemilla was highly amused. Words whooped from her on peals of laughter. "It's not poisonous, you."By my authority." Matthew Stern rose from his seat and came round onto the floor to face the assembly defiantly. "This prattling has continued for too long. I have no eloquent speeches to make. Enough time has been wasted on such futilities already. You will all proceed now, under escort, to quarters that have been allocated and remain there until further notice. We have business to attend to." He nodded at Stormbel, who motioned at the guards. "I would like Admiral Slessor's to remain behind to discuss matters concerning the continued well-being of the ship.".What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower l/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..Putting down the lemonade, Leilani relented: "Oh, all right. I'll bite. When were you shot in the head,,hurries after the dog. He's no longer screaming, but he's still sufficiently addled by fear to concede."The congressman has a nice sense of humor."..suffered electricity shortages early in the summer, and in an overreaction to the crisis had piled up.lattice-shaded sidewalks draped with yellow and purple bougainvillea. In spite of those inviting arbors, no.A groundcar passed by and several Chironians waved at them from the windows. "It can't be quite like that," Jay said. What does she do?".Murphy looked pleased. "Don't you think it has a fine ? tone? It's one of Chang's. He makes them."..Bernard's eyes widened incredulously. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. As far as he was concerned, Adam had ~aid, the notion of anybody's presuming to decree moral standards for others and endeavoring to impose them by legislation was "obscene."..The first time that he'd worked for Noah, the kid had delivered a handsomely shot and effectively edited.west to action in the east..But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. Something very strange was going on, Colman told himself again.."That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them?..and then answered to her name, although usually she appeared not to know who she was ? or to care..Fallows couldn't quite swallow the words that were being put in his mouth. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. But of course that's just an opinion."..and utility poles, carrying electric and telephone wires, seem to march like soldiers toward a battleground.For a few seconds Bernard and lay were too stunned to say anything. "But... that's crazy," Bernard protested at last. "You can't just let everybody go round shooting anyone they don't like."..Oh. Yeah. My dog," the boy says, feeling stupid and dismally incompetent at this.about his stowaways.."I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek "He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested..Lesley nodded. "He's been there all evening. Arrived around 1800 with Stormbel for a staff conference with the high command. They're all in there .-." He frowned at the expression on Colman's face. "Nobody

knew?". "Well-of course." "I never imagined you were. More news? Karla's house was bought with Circle of Friends money. Half." "Don't bother looking," Colman said. "He's got the late duty." "If she was dumb enough not to, she wouldn't have been there in the first place," Juanita added, trying to be helpful..even once, were they, Michelina?". "Your comparison is quite invalid," a girl who was with the boy pointed out. "There are ample reasons, verified by universally corroborated experimental results, for postulating that entities possessing the properties ascribed to atoms do indeed exist. Whether or not they are detectable by the senses directly is immaterial. Where are your comparable data?". "If anyone could, they could," Veronica said from across the room. "That bunch could clean out Fort Knox without anyone knowing." "You mean you'll be gone in a week?" Aunt Gen asked. A web of worry strung spokes and spirals at the. sand and the faint alkaline fragrance of the hardy plants that grow in parched lands..Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." He had brought the things with him, just in case..Clump, clump, clump, clump. His train of thought was derailed by the sound of steady tramping approaching from his left--not the direction in which the detail had departed, which shouldn't have been returning by this route anyway, but the opposite one. Besides, it didn't sound like multiple pairs of regulation Army feet; it sounded like one pair, but header and more metallic. And along with it came the sound of two children's voices, whispering and furtive, and punctuated with giggles..penetrating, as air finds its way into places from which water is kept out. "He can't have been here ten. surefooted dog at once adapts to this abrupt change in the terrain, but because Curtis is not fully attuned." "Oh, let your father go with Jay, dear," Jean said. Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him." .The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on' the left side of the large room inside the door, and a four-piece combo playing around the comer in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swley on spinach and fish.
