The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite. What he was starting to glimpse hadn't just to do with the physics; it was the completely new philosophy of existence that came with the physical interpretation.. "Not interested?" "Thoroughly and repeatedly. There is no risk that the Mayflower II might be exposed at any time," Gaulitz answered.. "Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents..of the bite, excited by the prospect of the entertainment to come..that has broken out behind him.. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room..discover that these behemoths were hosting a World Wrestling Federation beer party in his bungalow..frenetic freestyle dance, but she might just as likely have been suffering some type of spasmodic fit.. "You're looking more like a mutant all the time..". "Nine. But I'm precocious. What's your name?".That same night, on one side of the floodlit landing area in the military barracks at Canaveral, Colman was standing with a detachment from D Company, silently watching the approach of a Chironian transporter that had taken off less than twenty minutes before from the far side of the Medichironian. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead..A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..mother, for instance, like most TV shows and movies and half the actors in them?although not, of.Chapter 10.Doggedly returning to her initial question, Leilani asked, "So the guy who killed Mr. D?was he

Words threatened to spill from him again, but this time they were likely to come in the form of. "Of course, dear." Geneva slid the dish of garnishes across the table.. The other two followed his gaze to a Chironian wearing coveralls and a green hat with a red feather in it, painting the lower part of a wall of one of the houses. Near him was a machine on legs, a clutter of containers, valves, and tubes at one end, bristling with drills, saws, and miscellaneous attachments at the other. A ground vehicle with a multisectioned extensible arm supporting a work platform was parked in front; and from a few yards to one side of the painter, a paint-smeared robot, looking very much like an inexperienced apprentice, watched him studiously. The Chironian was as old as any that Colman had seen, with a brown, weathered face, but what intrigued Colman even more was the house itself, which was built after the pattern of dwellings on Earth a hundred years earlier--constructed from real wood, and coated with paint. It was not the first such anachronism that he had seen in. Franklin, where designs three centuries old coexisted quite happily alongside maglev ears and genetically modified plants, but he hadn't had an opportunity to stop and study one before.. "After twenty years on the same ship? That's not possible, surely." .approach, however it came, would be a lot more discreet than this." Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest.. "I have no idea," Colman said, grinning. Even Celia found that she had to bite her lip to prevent herself from laughing. "So what happened? Did you send them back up?". Colman groaned. The target could only be the Kuan- y-- yin. If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. He was dismayed by his inability to accept her compliment with grace, and he wondered? though not. "Well, I--I can't pretend to know anything about that side of things, sir." Colman nodded tightly. "A while back now, but..." But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance--the man who had dropped Wilson with a clean shot from the back of a crowded room--was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers.. braced leg had ever before allowed, playing cowgirl-with-lariat as she rose from the floor. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" "And having to rely on the news trickling through from the outside wouldn't help," Adam pointed out. "There have been so many rumors already. It would be more likely to just fizzle out." Geneva's backyard. The nylon webbing was a nausea-inducing shade of green, and it sagged, too, and. As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the. risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." "The build-up at Canaveral is proceeding on schedule and will be completed before midnight," he informed Sterm at a midday staff meeting in the Columbia District's Government Center. "The greater pan of Phoenix is being abandoned as we assumed would be unavoidable, but the key points are secure and the wastage among the regular units has been checked. Transfer of SD forces to the surface will be completed by early evening, with the exception of those units being held to cover the Battle Module, the Columbia District, and Vandenberg. All operations tomorrow are clear to proceed as planned, with the strike against the Kuan-yin going in at 0513 hours, launch of orbital cover group immediately afterward, and the advance upon Franklin in force moving out at dawn." Sinsemilla snored softly. Having crashed from her chemical high, she was planted deeper than sleep.. Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans.. Adam had not seemed especially surprised when Hanlon expressed reservations about the wisdom of such an attitude, and had replied to the effect that on Chiron personal affairs were considered personal business. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. Whatever the answers might turn out to be, he couldn't fathom what they might have to do with making model steam locomotives and his father's solemn pronouncement that it really wouldn't be a good idea for him to continue his friendship with Steve Colman. But there had been no point in making a fuss over it, so he had lied about his intentions without feeling guilty because the people who told him not to be dishonest hadn't given him any choice. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that.
