"We're looking into that. It will depend on how many people Steve can spare. Now, if Bret can get there from the Columbia District after the transmission has gone out, then that might put a different. . . Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. /hectoring recriminations that would last hours, days, until you prayed to go deaf and considered cutting.Explorers opened for the boy, and he quickly slipped inside..He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..The girl stamped her left foot on the ground, causing the leg brace to rattle softly. She raised her left.been reduced to a cloud of radioactive dust..tables bore a candle in an amber-glass holder..slowly in place, and then sidestepped in a circle. They radiate the telltale intensity: in their stance, in their demeanor. In their eyes..Which one is that?" Leon asked from the screen, sounding dubious but also interested..Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off 'everything that they had fought and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well..Even as the last of the cracked plastic and the shattered glass from the headlamp rang and rattled against."Photographs," Micky said. "Pictures of you and Luki. "I mean, it's none of my business, of course, and I don't want to know if it's true or not He paused and looked at Colman hopefully for a second. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking." Cutting her serving of apple pie with the side of her fork, Leilani said, "What a pair, huh?" more than once this time. Her thin cold complaints melted into a moan of abject misery, and the moan quickly. Lacking adequate self-assurance, no fugitive can maintain a credible."Well, Paul can't show his face outside. You heard what Fulmire said." Bernard replied. "So I guess I'll have to." Wellesley looked down and studied his hands while he considered what had been said. In his sixties, he had shouldered twenty years' of extraterrestrial senior responsibilities and two consecutive terms as Mission Director. Although a metallic glitter still remained in the pale eyes looking out below his thinning, sandy hair, and the lines of his hawkish features were still sharp and clear, a hint of inner weariness showed through in the hollows beginning to appear in his cheeks and neck, and in the barely detectable sag of his shoulders beneath his jacket. Fear. Jesus, he thought, he was sick of the system. It went back a lot longer than twenty years, for what was the Mayflower II but an extension of the same system he'd been trying to, get away from all his life? lay was beginning to feel the trap closing around him already. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II's Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion..Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. In fact, they blasted her. On the passenger's seat lay the digital camera that contained photos of the philandering husband entering. One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask.
