She flicked a pebble at Diamond. It turned into a wizards who worked for such men as Losen, letting fear or greed pervert magic to evil ends.. Under Roke's steadily growing influence, wizardry was shaped into a coherent body of knowledge, its use increasingly controlled by moral and political purpose. Wizards trained at the school went to other islands of the Archipelago to work against warlords, pirates, and feuding nobles, preventing raids and forays, imposing penalties and settlements, enforcing boundaries, and protecting individuals, farms, towns, cities, and shipping, until social order was re-established. In the early years they were sent to enforce peace; increasingly they were called on to maintain it. While the throne in Havnor remained empty, for over two hundred years Roke School served effectively as the central government of the Archipelago.. "But you do have a talent." however well sung, wrecks the tune it isn't part of. Women teach women. Witches learn their craft. "There, you see -- did you know in which direction the water flowed before it. . . ?". "I will take you there," he said, stiffly, laboriously.. circles of ripples from his movement were slight and small. It was shallow for a long way. Then. It was hard work out in the pastures. "Who doesn't do hard work?" Emer had asked, showing her round, strong arms, her hard, red hands. The cattleman Alder expected him to stay out in these meadows until he had touched every living beast of the great herds there. Alder had sent two cowboys along. They made a camp of sorts, with a groundcloth and a half tent. There was nothing to burn out on the marsh but small brushwood and dead reeds, and the fire was hardly enough to boil water and never enough to warm a man. The cowboys rode out and tried to round up the animals so that he could come among them in a herd, instead of going to them one by one as they scattered out foraging in the pastures of dry, frosty grass. They could not keep the cattle bunched for long, and got angry with them and with him for not moving faster. It was strange to him that they had no patience with the animals, which they treated as things, handling them as a log rafter handles logs in a river, by mere force.. questions!" Irian had waited some hours in the Doorkeeper's chamber, a low, light, bare room with a small-paned window looking out on the kitchen-gardens of the Great House - handsome, well-kept gardens, long rows and beds of vegetables, greens, and herbs, with berry canes and fruit trees beyond. She saw a burly, dark-skinned man and two boys come out and weed one of the vegetable plots. It eased her mind to watch their careful work. She wished she could help them at it. The waiting and the strangeness were very difficult. Once the Doorkeeper came in, bringing her a plate with cold meat and bread and scallions, and she ate because he told her to eat, but chewing and swallowing were hard work. The gardeners went away and there was nothing to watch out the window but the cabbages growing and the sparrows hopping, and now and then a hawk far up in the sky, and the wind moving softly in the tops of tall trees, on beyond the gardens.. "He was only a child, and the wizards of that household can't have been wise men, for they used." "What say you, Emer?" asked the one like a falcon.. Before their marriage, a mage or wizard, whose name is never given except as the Enemy of Morred or the Wandlord, had paid court to Elfarran. Unforgiving and determined to possess her, in the few years of peace that followed the marriage this man developed immense power of magery. After five years he came forth and announced, in the words of the poem.. "Avert!" Irian blurted out, making the sign to prevent word from becoming deed. None of the men smiled, and the Herbal belatedly made the same gesture.. "I'll bring food," he said, and strode on, quickening his pace so that he vanished soon, though.
