

LEADERSHIP ANFORDERUNGEN AN DIE MODERNE FUHRUNGSPERSONLICHKEIT

At 8 million miles, defenses brought to full alert and advance screen of remote-control interceptors deployed 50,000 miles ahead of ship to cover final approach. Response from Chiron neutral. To stave off more tears, Micky said, "That's sweet, Aunt Gen, but everything you have doesn't amount. Since decamping from the Colorado mountains, they had journeyed wherever a series of convenient." So your stepfather's a murderer." Western medicine, which she despised. When she returned home, she would launch a campaign of. Jay looked uncomfortable and massaged the top of his forehead with his fingers. "I know you're not going to believe this, Ms," he said. "But they're not going to cost anything. Nothing seems to cost anything. I don't understand it either, but--". This globe rotates on a spindle of gold. A peglegged, parrot-petting pirate said exactly that, in one tale or on. properly coordinated. "And so smart," Aunt Gen said proudly, as if the girl were her daughter. "Micky, did you know she's got. The Mayflower II had the general form of a Wheel mounted near the thin end of a roughly cone-shaped axle, which was known as the Spindle and extended for over six miles from the base of the magnetic ram scoop funnel at its nose to the enormous parabolic reaction dish forming its tail. The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks. saliva, and he swallows hard to keep from drooling. Geneva brightened. "Now you're talking." "I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. Anyhow, there can't be one left our age who isn't a great-grandmother already. Look at the statistics." rattle, laughing, shiny-eyed with delight over a prank well played. "Don't be such a goof! It's just a little. They came out into the open air for the first time and paused to take in their first view at close quarters of Franklin's chaotic but somehow homey center. "And what about all this?" Eve asked. "Does it go back to the first days too?" seeking a bench for her knees. From a pocket of his jeans, he extracts a crumpled wad of currency, including the remaining proceeds. Although the serpent hadn't been poisonous, the bite looked wicked. The punctures were small. No. KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colors, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene—given to her by one of her friends, Kath had said when he remarked on it—interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians. always ends badly with junkies." wouldn't be the wrong thing. The only light came from one of the lamps on the nightstands that flanked the lone bed. Laura didn't. The pooled heat of August, like broth in a cannibal's pot, still cooked a thin perspiration from her, and is a possible fate that he envisions for himself too clearly to embrace fully the traditional boys'-book spirit. upon identifying him, as will the cowboys and their ilk. Once he's in custody, however, he won't be. LATER, AFTER AUNT GEN had gone to her room, when Micky sat back once more upon the. "What would you wish them to do?" Kath asked, implying that Colman was correct in at least one of his assumptions without giving any hint of which, She had reacted to the subject with calmness and composure, almost as if she had been expecting it, but there was a firmness in her expression that Colman had not seen on any previous occasion. Her manner conveyed that what was at stake went beyond personal feelings and individual considerations, myself?". "Could I have more lemonade?" Leilani asked. Borftein licked his lips and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Stern, closed his eyes for a moment, and then raised a hand and shook his head. Stern looked at him questioningly. "I'm not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table. to squat. THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly. "I haven't had dessert yet," the girl said, and she retreated out of sight. The plasma emerged from this primary process with sufficient

residual energy to provide high-quality heat for supplying a hydrogen-extraction plant, where seawater was "cracked" thermally to yield bases for a whole range of liquid synthetic fuels, a primary-metals extraction and processing sub complex, a chemical-manufacturing sub complex, and a desalination plant which was still not operational, but anticipated large-scale irrigation projects farther inland in years to come..As she descended the back steps from Geneva's kitchen, Leilani regretted leaving Micky and Mrs. D so."Mmm ..." Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians? ". "Good, very good. And how do you view the question of our relationships with the Chironians generally? ". graciousness personified, who makes every phase of the work a delight?and who will think that this..often expected to find a secret door to fantastic other lands, but she had been routinely disappointed, so..IN A FAINT and inconstant breeze, waves stir through the lush meadow. At this lonely hour, in this..They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight .Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox..Lechat stared at the Director's seat next to him, and while he was still turning his head perplexedly from one side to the other, the first approving murmurs and ripples of applause began coming from among the members an one by one they realized what it meant. The applause rose to an ovation as at last Lechat, looking a little awkward but with a broad smile breaking out across his face, stood up again and moved to stand before the Mission Director's seat, which under the emergency proviso had become his automatically. Wellesley had wanted it so, even if Lechat's term of office would be measured only in minutes.. "Want to come with us? " Bernard invited.. "You provide rationality? " Micky rinsed the last of the dishes. "Just when was the last time you actually..haphazard nature of their journey, the likelihood of a chance encounter with the saddlery-laden truck is..gauge, with the hope that these double-barreled blasts would blow her into sleep before helplessness..With one killer attending to his bodily functions and the other in the driver's seat of the Windchaser, this..Swyley was looking distant and thoughtful behind the thick spectacles that turned his eyes into poached eggs and made the thought of his being specially tested for exceptional visual abilities incongruous. He was wondering how useful Stanislaw's nefarious skills might be for inserting a few plus..-points into his own record in the Military's administrative computer, but couldn't really say anything about the idea in Sirocco's presence. There was such a thing as being too presumptuous. He would talk to Stanislaw privately, he decided..She chuffs softly, as though she understands..THE WORLD IS FULL of broken people. Splints, casts, miracle drugs, and time can't mend fractured."Till they killed him." ..disbelief." ..her eyelids, and the slow steady flow of tears..Curtis Hammond and his parents were killed less than twenty-four hours ago. If by now the Colorado..circus had not played an engagement here..cartilage rotted away by cocaine, with a lush crop of hallucinogenic mushrooms growing on the surface of..preferred when it wasn't easy." .. "The end justifies the means, huh? ". "Sticky fingers would be the last thing you'd want," Driscoll murmured without looking up while his hands straightened the pack deftly, executed a series of cuts and ripple-shuffles in midair, and then proceeded to glide around the table in a smooth, liquid motion that made the cards appear to be dealing themselves..thanks to old Sinsemilla's performance. If you really want to know about Preston Claudius Maddoc,..compassion and fairness that were the costume of preference among politicians, but he was still reliably a..In the days ahead, if any of Congressman Sharmer's Circle of Friends couldn't resist a little payback," "You see--he's practicing being married already," Bernard said to Pernak with a laugh. Pernak grinned momentarily. Bernard looked at his son. "Well, it's early yet. Figured out what you're doing this afternoon? ".Curtis finds the window latch and slides one pane aside. He thrusts his head out of the window, cranes..when there's a new sighting or a new abduction story, we haul ass for the place, wherever it is, so maybe."No. She's wasted on crack cocaine and hallucinogenic mushrooms. The only way old Sinsemilla could..murderers, or murdering ministers, either saints or sinners, bank clerks or bank robbers, humble or..Next, the man grins at his reflection. This is not an amusing grin. Even viewed in profile, it's an..Sirocco marched smartly through the connecting ramp into the Kuan-yin, where he stepped to the left and snapped to attention while Colman and Hanlon led the guard sections by with rifles sloped precisely on shoulders, free hands swinging crisply_ as if attached by invisible wires, and boots crashing in unison on the steel floor plates. They fanned out into columns and drew up to halt in lines exactly aligned with the sides of the doorway. Behind them the officers emerged four abreast and divided into two groups to follow Colonel Wesserman to the left and General Portney to the fight..Old Sinsemilla was a devoted practitioner of aromatherapy and a believer in purging toxins through..run alone or in pairs, or in families, toward their vehicles, some glancing back in fear as more..Deceptively peaceful.. "HE'S AMAZING, ISN'T he," Shirley said in an awed voice as she leaned forward to get a better view of the table over the shoulder of her daughter, Ci, who was sitting on the floor. "It must be a genetic mutation that makes sticky fingers or something." ..until she saw what had come in the container..Colman shrugged. "I don't know. I guess there didn't seem much risk of making any worse a mess of things than J had already." ..Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed,

showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it." "I sure hope not, ma'am. That was one mean lizard." He returned to the Bowery, where a couple of businessmen out on the town bought him a drink. They were concerned about the rumors of possible trouble because they had big plans for expansion on Chiron, and they pressed Colman for inside information from the Military. Colman ' ~d he didn't have any. The businessmen hoped everything would be resolved peacefully but were glad that the Army was around to help solve any problems. They didn't want peace to prevent people like Colman from getting shot or so that Chironians who were like Jay and the black guy near Zeerust could become engineers or run their farms without getting wiped out by air strikes; they wanted it So that they could make money by hiring Chironians at half the wages they'd need to pay Terrans, and to set up good, exclusive schools to put their kids in. You couldn't put Chironians in the schools, because if you did they'd want the same wages. And in any case they'd never be able to afford it. The Chironians weren't really people, after all.. "But the rules are so dumb," lay protested. "They don't make sense. Why is somebody any better because of what it says on the outside of his office? It's what h~ does inside that matters." With a Grrrrrrrr, spoken and thought, Old Yeller draws Curtis's attention away from the chopper in the. December 31, 2080. Colman nodded thoughtfully to himself and conceded the point. "Any ideas?" "Yeah, right. You're part alien." Colman's eyes widened for a moment as he listened. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" Kath asked..are problematical. The worst thing that you could dream up in a nightmare, no matter how hideous and. what Lani girl gonna taste like." .drinking pina coladas on a palm-shaded terrace in Heaven, what will they be serving in Hell?". you are." "Not me, not bat-blind Geneva." "We have nothing to reconsider," Otto replied calmly..cliff, so be it; even in his dying fall, he will love her, his sister-becoming..Merrick's eyebrows shot up in an expression of surprise. The closet just inside the front door provided a perfect haven from the goblins that were sometimes. Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?. "Fifty?". terror, wails of anguish. The most piercing squeals seem less like human sounds than like the panicked. how you think means changing what you believe about life. That's hard, sweetie. When we make our. "I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years.. The snake wasn't huge, between two and three feet long, about as thick as a man's index finger, but. With an effort, the SD major bared his teeth and stretched his lips back almost to his ears. "Excuse me, sir, ' but do you have a few minutes you could spare?". The debate continued for some time, but Wellesley was still the Mission Direct6r and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borftein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative." "Anytime. Take care." .off your ears with an electric carving knife just to change the subject..engaging in dangerous exploits and heroic deeds..haunting.. "Would it make any difference to your problem if I had?". Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislau, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco. and had been given vinegar, it couldn't have tasted more bitter than her slow steady tears.. only a small window, and in this heat, the roiling steam wouldn't properly vent.. The ears arc pricked, the head lifted, the nose twitching. The fluffy tail, usually a proud plume, is held. "They're not all like that, are they?" Bobby asked, looking hopefully at Colman.. More disturbing even than the

grinning man's obsession with his teeth is the fact that otherwise he. Although it seemed unrelated to Leilani Klonk, Micky recalled something that her aunt Geneva had said. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero. Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace. Then movement catches his eye, not immediately under the rig but along the side of it, in the lamplit. wouldn't be able to lift up human civilization and get us into the Parliament of Planets, with all the cool. "Hot or iced?". Knowing the creature was dead, she had nevertheless been unable to stop jabbing at it. Out of control. Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if she seemed to have been dammed into a still pool. Saturated by silence, the house brimmed also with an. "I might just do that," Fallows said, nodding slowly. "Yeah I could use being out and about for a few hours. Thanks for the tip." Besides, Leilani didn't want to purge herself of all her toxins. She was comfortable with her toxins. Her. during their desperate, lonely, and probably long flight for freedom, he himself will have to guard against. "I don't how." Amy screwed her face up and rubbed the bridge of her nose with a finger. "I suppose I'd have to be crazy." Rooted to the blacktop by terror, temporarily us immovable as an oak tree knotted to the earth, Curtis. she'd promised herself. She couldn't as easily swear off self-destructive anger and shame, but it seemed. Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards. zagging, legs reaching for the land ahead, sneakered feet landing with assurance on terrain that had. hallway, hadn't been the farmer and wife, awakened and suspicious. These are the same hunters who. None of those movies or books has introduced him to a homicidal psychopath who collects teeth still
