"Okay, okay, Hoover." Rastus held up an apologetic hand. "You know I didn't mean it. You do a great job here. And the displays today are very artistic." "out of Eden." He had gained the first foothold of his empire. "It's the beginning," he told Celia later that night. "Ten years from now it will have become the capital of a whole world. "That would be the murderer," Micky interrupted without a wink or a smirk, as though she'd never think." "No offense intended."..To Fallows, Merrick always seemed to have been designed along the lines of a medieval Gothic cathedral. His long, narrow frame gave the same feeling of austere perpendicularity as aloof columns of gaunt, gray stone, and his sloping shoulders, downturned facial lines, diagonal eyebrows, and receding hairline angling upward in the middle to accentuate his pointed head, formed a 'composition of arches soaring piously toward the heavens and away from the mundane world of mortal affairs. And like a petrified frontage staring down through expressionless windows as it screened the sanctum within, his face seemed to form part of a shell interposed to keep outsiders at a respectful distance from whoever dwelt inside. Sometimes Fallows wondered if there really was anybody inside or if perhaps over the years the shell had assumed an autonomous existence and continued to function while whoever had once been in there had withered and died without anyone's noticing.. "You've got your father's name," Geneva said hopefully. "If he could be found . . ."..eyes, a flash of teeth in the hooded beam of light. He almost cries out in alarm.. Glancing at his hands, seeing no rings, she said, "What for?" The Chironian in the purple sweater and green shorts asked.. "I don't know," Jay said. "It's a lot to go into now, but we're certain they've got the capability. It's really that urgent, Steve. When can you get over?" "Starting to feel a little better?" Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie..bricks on this road, and here, now, in the lingering sour scent of warm beer, in this small kitchen where." The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. Tell Swyley and Driscoll to stand down with you. They've been out there the longest." "Stop it," Micky said harshly though not angrily, her voice roughened by exasperation. "Just, please, stop." forced a smile. "Just remember that," she said. "I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." The heat. The dark. From time to time the wet rattle of melting ice shifting in the bucket. And without hunger, and though the flood of saliva is bitter, it fails to diminish his appetite. This had been worse than a sucky day. The language necessary to describe Micky's job search in its full. Leilani was gasping, not from exhaustion? she hadn't exerted herself that much? but because she was. STARSHIP COMMAND CENTER, CAPTAIN CURTIS HAMMOND. Spears. Twenty-four had escaped in all; nine had already given themselves up or been killed in encounters with Chironians. Anita had not been among them. Colman counted fifteen body-bags, which meant that she had to be in one of them. mother-daughter moment. It didn't matter that their roles were reversed, that the daughter was providing well. Instead, a barely perceptible yet awful sadness manifested as a faint glister in her eyes. "He shot my Vernon twice, and apparently then he shot me." something that required no effort, no slightest sacrifice. "So Dr. Doom is a UFO nut," Micky pressed. Leilani listened intently. The perfect tickless silence of a clock-stopped universe still filled the house. Clem waved an arm casually without looking back. "Go ahead," he said. "Can't see as you really need any, though. You're pretty safe up here. We don't get many burglars." Farnhill glanced helplessly at his aides, then braced himself and began leading the group after Clem while the Chironians parted to make way. The military deputation broke formation. to take up the rear with Wesserman tossing back a curt "Carry on, Guard-Commander" in the direction of Sirocco. Leon grinned. "Mischievous, but they're fun." He paused for a moment. "He seems to be a good man. You should be very happy until whenever. I hope nothing happens to them. They are all brave people. I admire them?" "Yeah, I remember now." the eve of her birthday would violate Preston's code of ethics, and he was as serious about his ethics as. Although the finest restorative surgeon couldn't have rebuilt her beauty, the worst of the horror might. "I keep a small stock reserved," Stern informed her. "It is from Earth-the Grande Champagne region of the Charante. I find that the Saint Emilion variety of grape produces a flavor that is most to my taste." His precise French pronunciations and his slow, deliberate speech with its crisp articulation of consonants were strangely fascinating. THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist. "What about when he was screwing the country?" Chicago once. . . . "Aunt Gen," Micky cautioned. Stanislaw slipped the compad into his pocket. "You don't wanna know about that," he said. Bouncing on the bed, giggling prettily, old Sinsemilla relived the comic moment: "Snake goes boing!" "And I am on early duty tomorrow," Colman said. He grinned again, and she smiled back impishly, "So why are we still here?" they asked together. arrive at a destination, but will race perpetually through alternating stretches of moon-dazzled meadow. Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron." The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?" But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other. thought that Burt Hooper was simply rude. "I'd help you if I could." He boosts himself against the sill. "Well... hi," he returned. The idea of getting up from the driver's seat. She shrinks away from them, and terror twists her face into. Werewolves in the misery of the moon could not have produced more chilling cries than those that caused. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon. She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or crosslight of the moon and the fading purple dusk, but that probably matched Leilani's shade of blond. Wellesley seemed thoughtful. "I wonder if Leighton Merrick and his specialists could run a place like that," he mused. After a few seconds, he added hastily, "Not immediately, of course, but at some time in the future, possibly, depending on circumstances. As insurance, it would certainly pay us to know something more about it." This novel is a work of fiction. Names, characters, places, and incidents either are the product of the "Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen. "And Alec Baldwin," Micky assured Leilani, "wasn't the man who held up Aunt Gen's store." Pernak twisted his face through a few contortions, then sighed again. "I know. That crossed my mind too, but what is there to provoke any real trouble? There may be one or two flareups before it's all over, but this state of affairs can't last." He shook his head. "We're convinced 'this is the only way to go. We can't make other people's minds up for them, but they'll come round in their own time. Anything else would cause worse problems." "I as a kid by an uncle who had died fifteen years into the voyage from a heart condition, but that was about all. because her circumstances had given her so much time for contemplation that she couldn't avoid shining a passing-for-nobody-special business. He hasn't given a thought to naming his four-legged companion. The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic bundles the size of sleeping bags. too hardened to be moved by the plight of anyone else. Appalled, Geneva looked as though she might bring to the table the brandy that Micky had thus far. Slessor's brow furrowed more deeply, He hesitated, thought for a moment, and then nodded. "Very well, I'll see it's done." He moved away from view.
