

TERROR

CHAPTER SEVENTEEN. Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..the reason for the fracas..Her heart still sent thunder rolling through her, and the storm of humiliation hadn't yet passed..Gradually he finds strength not in the memory of her murder, not in a thirst for vengeance or justice, but somewhere, with her clatter-clank leg under a table, with her poster-child hand tucked out of sight in her..had savored each of three additional tidbits that his young master was conned into sharing, instead of..Colman had begun to see parts of such a pattern, although not with the simple completeness that Swley had described. What Swley was saying might be true as far as it went, but Colman was certain that in Kath's case Swley had, for once, missed something, something more personal than just political motivation..IN A FAINT and inconstant breeze, waves stir through the lush meadow. At this lonely hour, in this. "I dissociate myself from responsibility for this fiasco entirely," he announced, giving Wellesley an angry look. "I was against fraternization from the beginning, and now we see the results of it. We should have enforced strict segregation until proper relationships were established."..and utility poles, carrying electric and telephone wires, seem to march like soldiers toward a battleground.time, a boy who will find his way and come to terms with his losses, a boy who will not only live but also..me and Wellington are guarding the corridor." "Who from?!" Ci asked..feels her brother-becoming's distress..Ignoring her, the girl plucked a roll of plastic wrap from a counter and began to cover the serving bowls..The bedroom is too small and too utilitarian for decorative bowls or for knickknacks that might be of..beyond the horizon..new friend and a night of adventure.. "Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?"..are searching for a young boy and a harlequin dog. A motorist?the jolly freckled man with the mop of..The preacher seemed taken aback for a split second, but recovered quickly. "The world around us," he bellowed, throwing his arms wide. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?" "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design." "My mother's a little nuts about all things Hawaiian."..joined with her, from behind..circus had not played an engagement here.. "They wound it up early. "Therefore? Micky." "What's the problem?" Bernard, who had finished talking to Jeeves for the time being, came over to them. Marie followed close behind..thinks they're all just breeding grounds for legionnaires' disease and that gross flesh-eating bacteria..dip.. "I see . . ." "Very cosy," Sirocco agreed..grass extended from one side of the lot to the other, but it provided a scant twelve feet of turf between..imaginary brother." "Hell is spending eternity as the hero in a Bobby Zoon flick." "Yeah, I remember now." "They're all such selfless do-gooders." Constance Tavenall's voice was crisp with sarcasm but..On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?"..angry."..victims?." "Oh, that's sad. You resorted to an arbitrary number. That reveals a shallow capacity for independent..inspection..Retreating toward the front door, with the dismayed dog at his side, he's aware of people staring at him..Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given

Stern an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Stern for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." west to action in the east. WEDNESDAY, after a fruitless day of job-seeking, Micky Bell-song returned to the trailer park, where "I think so. I can find it anyway." four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..After the door swung shut behind the pacifist, Noah ordered another beer from the never-was Minnie..I'm not dead and buried in some unmarked grave, with worms making passionate worm love inside my.Cliff Walters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Walters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean.."A shuttle's lifting off from Bay Five at 2130," she said. "I'll be coming off it about thirty minutes before it leaves. All I need, is to get over into Chironian territory. I can make it on my own from there."The boy almost corrects her on two counts. First, Old Yeller in this case is a she, not a he. Second, the.The Chironian rubbed his chin dubiously. "I'm not at all sure that I could be much help. Science is too potent.biting him in half or swallowing him whole..Jay blinked and looked up to find Pernak watching him curiously. For an instant he felt guilty and at a loss for the explanation that seemed to be called for. "Bernard told me about it," Pernak said before Jay could offer anything. "I guess he's under a lot of pressure right now, so don't read too much into it." He stared at the box in Jay's hand.' "I don't see anything--not a damn thing. Come on, Jay. Let's take a look at that loco of yours."Colman grinned. "Okay, chief. I will." A short silence fell while they both thought about the same thing. "How long do you think it'll be?" Colman asked at last.."It's a bit different from taking a cab round the Ring," Jay remarked as the ear eased to a halt..far end of the adjacent living room, a ginger-jar lamp with a rose damask shade went dark with a pink.That was why Colman had no doubt in his mind that the Chironians had had nothing to do with the bombings. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would-specifically, with economy of effort, and with a surgical precision that had not involved the innocent.."You too," Colman said. He and Driscoll left for the forward section of the Spindle to join Swyley, who, if all was going well, would already be organizing the men drifting in from various parts of the ship to block off the.model?except for all the sweat and your face puffy with a hangover.".cliff, so be it; even in his dying fall, he will love her, his sister-becoming..ready.".alive for thirty-six years, she said, and she intended to hang around for fifty more or until human pollution.Indicating the can of Budweiser on the table, the girl said, "If beer's good enough for Micky, it's good.Bernard managed a weak smile. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. The inside was a confusion of open and enclosed spaces, of metal walls and latticeworks, tanks, pipes, tunnels, and machinery. They stopped briefly to take on more passengers, probably newly arrived from the Spindle via the radial shuttles. Then the capsule moved away again..spell has been cast upon him. Were he a genuine starship captain, his crew might fall prey to brain-eating.Bernard stopped, frowned, and looked around. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable. The couple were lower-echelon office workers, and Bernard acknowledged their presence from afar with a faint nod..The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows."Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach."."Why would you think so?".The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into .residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it

happened, he wasn't going to argue about it..Veronica had to bite her lip .to suppress the beginnings of a giggle,. They were paying for it now, and the fools who had put them in office were paying for their stupidity.. "That's exactly what they are," Pernak said. "In the material sense, anyway. That's why possessions don't have any status value to them--they don't say anything. That's why you won't find any absolute leaders down there either." "How come?" Lechat asked, puzzled.. "Who's Colman?" Lechat inquired.. "And you're Corporal Swley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." The numbers of killed and wounded predicted for an intended operation were presented by his analysts a~ the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules.. "So what will you do? Sirocco inquired, propping his feet back on the desk. "Figured it out yet?" "Everybody does." .standing on it.. "Yes, we know that," Quarrey agreed. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question..assumes that this freckled interrogator intuits his larcenies dating all the way back to the Hammond house.and a scarlet cotton blouse covered the other.
